FCC ID: UJIAA10018POWER

Circuit Description

The <u>27.145</u>MHz crystal oscillator drives the base of <u>Q4</u> the final/buffer amplifier. The modulation provided by <u>IC</u>. The output of <u>Q4</u> has the matching network consisting of <u>C10, C11, C19</u> and <u>T2, L2</u> that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of an <u>81.5</u>cm long telescoping chrome over brass tubing / Metal antenna.

There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 9 Volt ("AA" size battery x 6) primary battery

Operation Descriptions

The transmitter is a <u>remote control toy</u> operating at <u>27.145</u>MHz band. The transmitter is powered by a <u>9V</u> battery (<u>"AA" size battery x6</u>) and the transmitting frequency is crystal controlled. There are <u>2 joystick</u> to control the forward reverse motor and director of movement. The operation is achieved by different combinations of form pulse modulating signal on the <u>27.145</u>MHz carrier frequency.

Remarks:

The transmitter is a 2 Joystick transmitter.

The EUT continues to transmit while Joystick is being pressed.

It is <u>Pulse</u> transmitter, Modulation by <u>IC</u>; and type is <u>Pulse</u> modulation.
